

# SurePoli™

Superior Polishing Disc System

---

## Finish with long lasting performance

Achieving successful dental restorations involves excellent finishing and polishing. SurePoli finishing and polishing discs make it easier than ever to perform the job, ensuring that your restorations achieve a final outcome that matches natural dentition.

# SurePoli™

Superior Polishing Disc System

**FLEXIBILITY:** The bendability of the disc enables effortless access to difficult-to-reach areas, including the posterior region, for effective polishing.

**COLOR CODED:** Easy, colour-coded system allows for quick identification of grit sequence. Discs are also available in two different diameter sizes depending on your application

**SIMPLICITY:** Is made of polyester coated with aluminum oxide particles. Its abrasive layer has no extra adhesive coating. Once you attach the disc to the mandrel, you are instantly prepared for use!

Disc Type	Indicated for
Coarse	<b>GROSS REDUCTION AND CONTOURING</b> • To adjust primary geometric form.
Medium	<b>FINISHING</b> • To remove composite excess, shape occlusal anatomy, lingual fissures, and secondary anatomy.
Fine	<b>POLISHING</b> • To erase surface scratches, and reduce surface roughness
Super-Fine	<b>HIGH GLOSS POLISHING</b> • To reduce surface roughness to high gloss

**Great for composite, glass ionomers, amalgams, semiprecious and precious metals**
